

AVE video intercom, a smart and stylish proposal with the System 44 solutions

Perfectly integrated with home automation and burglar alarm, AVE video intercom is also innovative in design, thanks to S44 aesthetics and technologies, with which it combines to create revolutionary smart homes.

Recently presented, the range dedicated to **AVE video intercom** has been designed to offer the best, both in terms of technology and style. Thanks to the **aesthetic coordination** with the **AVE System 44 wiring accessories and front plates**, the system possibilities expand, allowing you to create cutting-edge solutions, enhanced by all the AVE S44 innovations, including the advanced **touch switches** and the original **concepts with toggles**.

In addition to the multiple integrations and smart features that make unique **AVE video intercom** system - such as **AVE home automation and anti-intrusion supervision**, IP camera monitoring and the ability to remotely answer calls via app - it also stands out for its aesthetic connotation, starting from the **"Viva-Voce" Touch Screen**, that is **the largest video-intercom station in its category** thanks to its 10" interactive display. Available with black front plate (Cod. TS10N-V) or in total white version (Cod. TS10B-V), its refined design with bi-material structure **in aluminium and glass** is an added value for installation opportunities. In fact, this device is capable of giving a touch of class within the environments in which it's inserted, giving the home **a modern and hyper-technological mood**. The same of the innovative sliding front plates, an AVE patented system that allows the plate to slide on the power outlet ensuring greater safety (especially for children) when it isn't in use. The same that distinguishes the **touch switches**, where the use of aluminum (Allumia Touch), glass (Vera Touch) - also available in Multi-Touch version (with up to six independent commands - and moulded (Young Touch) combines with the "Ave Touch" touch technology to give life to design objects that revolutionize the way in which the light is turned on and the connected automations are controlled. And it's precisely on the basis of these concepts that AVE has also designed its outdoor video intercom range. Available in versions for single, two and four-family homes, the **"Villa" design external units** exhibit an aluminum and glass frame with Sensitive Touch front, while the **"Vandal-proof" models** are characterized by a robust and resistant metal structure.

For maximum system flexibility, AVE video intercom system relies on the countless AVE System 44 solutions, which features different series of switches, sockets, thermostats, wiring accessories, and a wide range of front plates in metal (Zama 44), glass, wood, aluminium and Corian® (Vera 44), moulded (Young 44, Moulded 44) or customizable ones (Personal 44). In this way, you can satisfy every need and ensure **perfect aesthetic coordination between the electrical system and the video intercom system**. For those wishing to characterize their rooms with an original touch and high aesthetic value, the iconic **AVE Style collections** are also available, which reinterpret the ON/OFF **toggle system** combining it with front plates in glass, aluminium, Corian® (New Style 44) and wood (England Style 44).

In addition to its technological innovation, **AVE video intercom also stands out in aesthetics**, thus increasing the opportunities for the installer, who has at his disposal a highly advanced and stylish system. Opportunities that further expand thanks to **DOMINA Smart**, the AVE home automation solution that combines the best of security and communication with

NOTE: It requires an Internet connection. Controlling certain devices and features requires a compatible smart device. Controlling devices such as home appliances requires compatible smart plugs, devices and/or switches. Subscriptions may be required, and additional terms, conditions and/or charges may apply; they don't depend on AVE S.p.A. AVE S.p.A. declines any responsibility regarding the internet connection because service's supply isn't its competence. AVE S.p.A. disclaims any responsibility related to the incorrect use of the AVE Cloud and AVE Connect services. We recommend to contact a professional in order to achieve a perfectly done system's configuration.

remote control and voice commands: all in one **wide integrated IoT ready system**, that is quick to install, simple to manage and to propose, a complete system for creating the **latest generation buildings and smart homes**.
